During 1985 a significant effort was made to reduce the generation of hazardous waste through internal recycling and re-use of off-spec ink and cleanup solvents. To the best of our knowledge, non-recyclable waste generated in 1985 following cleanup actions in the spring and summer amounted to approximately 955 gallons. See attached letter for further detail concerning the cleanup action. Insufficient information exists to allow an accurate determination of the wastes generated in previous years.

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.
